Clone in Desktop

If applicable to the selected task, the **Properties** tab will list runtime parameters that should be applied during the import.

After clicking import, your results will appear on a **Results Tab**. As multiple tasks are run, each result tab will be given a new name. ([User Interface - Viewing Results](#))

See [File Import Rule](#) for a more detailed explanation.

Importing a sequence of numbers

For comparison purposes, the File Analyzer can generate a sequence of numbers that conform to a specific pattern. This can be useful for performing a **merge** with other results. This feature will not be used frequently.
